

Benchmark® Hail History Report

Date of Report
September 10, 2018 16:36 CDT
Claim Details
Property Address:
610 10TH ST
Agent/Adjuster Name:
Kimberly D. Burnell
ZIP Code:
FENNIMORE, WI
Company:
Travelers
Claim Number:
53809
Address:
Reported Date of Loss:
LA56442
Phone:
Reported Cause of Loss:
9/9/18
Email:
KBURNELL@travelers.com
Assignment Date:
42.983029
Latitude:
Report Period:
01 Jan 2009 - Present
Longitude:
-90.649039
Benchmark® Weather History near location since 1 January 2009

Date	At Property Address	Within 3 Miles

Benchmark® Hail History Report

Description of Hail Measurements

Damaging weather values

Measure	Units	Description	High	Typical	Low
Estimated Size of Hail	Inches (Diameter)	0.75" is lower boundary of hail size that causes property damage. Typically damaging hail ranges from 1-4" diameter. Approx. sizes: 3/4" dime; 1" quarter; 1.5" ping pong ball; 1.75" golf ball; 4" grapefruit; 4.5" softball.	1-4"	< 1"	< 0.75"

Benchmark® Weather History Reports

Benchmark® data has been demonstrated to align with the occurrence of severe weather. We regularly review its accuracy and calibrate our algorithms using industry claims data to maximize performance. Benchmark processes high resolution hail, wind, precipitation and reflectivity radar data using numerical models and proprietary algorithms developed by our advanced- degreeed meteorologists and scientists. We ingest data from the WSR-88D radar network using the dual polarization capability to derive the most accurate representation of the weather. At Verisk, we create hazard indexes that specifically pertain to the insurance industry and their service partners.

Verisk provides software, data, and analytics for enterprise climate risk management. Insurers can apply these solutions to help improve customer service, achieve more accurate risk selection, and reduce claims cycle time. Manufacturers, distributors, and retailers rely on Verisk to accelerate revenue growth through more accurate forecasts of product demand and to promote stable operations by helping mitigate supply chain risk. Our analyses and results draw on disaster risk models from AIR Worldwide®, vertically integrated data from Verisk Analytics, and environmental data and expertise from Atmospheric and Environmental Research (AER™).
